INDEX TO AUTHORS

ANDERSON, THOMAS F. See COHEN and ANDERSON, 511, 525

ANFINSEN, CHRISTIAN B., GEIMAN, QUENTIN M., MCKEE, RALPH W., ORMSBEE, RICHARD A., and BALL, ERIC G. Studies on malarial parasites. VIII. Factors affecting the growth of *Plasmodium knowlesi in vitro*, 607

—. See GEIMAN, ANFINSEN, MCKEE, ORMSBEE, and BALL, 583

—. See MCKEE, ORMSBEE, ANFINSEN, GEIMAN, and BALL, 569

BAKER, JAMES A. A rickettsial infection in Canadian voles, 37

BALL, ERIC G. See ANFINSEN, GEIMAN, MCKEE, ORMSBEE, and BALL, 607

—. See GEIMAN, ANFINSEN, MCKEE, ORMSBEE, and BALL, 583

—. See MCKEE, ORMSBEE, ANFINSEN, GEIMAN, and BALL, 569

BERRY, GEORGE PACKER. See EVANS, SLAVIN, and BERRY, 429

BIER, OTTO G. See MAYER, OSLER, BIER, and HEIDELBERGER, 535

BLATTNER, RUSSELL J. See SMITH, BLATTNER, and HEYS, 1

CLAUDE, ALBERT. Fractionation of mammalian liver cells by differential centrifugation. I. Problems, methods, and preparation of extract, 51

—. II. Experimental procedures and results, 61

COHEN, SEYMOUR S., and ANDERSON, THOMAS F. Chemical studies on host-virus interactions. I. The effect of bacteriophage adsorption on the multiplication of its host, *Escherichia coli* B. With an Appendix giving some data on the composition of the bacteriophage, T2, 511

— and —. II. The chemical simulation of the interference phenomenon by 5-methyl tryptophane, 525

DE MELLO, GILBERT. See WATSON, ROTHBARD, and SWIFT, 127

DOAN, CHARLES A. See SASLAW, WILSON, DOAN, WOOLPERT, and SCHWAB, 113, 263

DOLE, VINCENT P. See LANCEFIELD and DOLE, 449

DUBOS, RENÉ J., and GEIGER, JAMES W. Preparation and properties of Shiga toxin and toxoid, 143

EHRICH, W. E. See HARRIS and EHRICH, 157

ENDERS, JOHN F., KANE, LEWIS W., MARIS, ELIZABETH P., and STOKES, JOSEPH, JR. Immunity in mumps. V. The correlation of the presence of dermal hypersensitivity and resistance to mumps, 341

—. See MARIS, ENDERS, STOKES, and KANE, 323

—. See STOKES, ENDERS, MARIS, and KANE, 407

EVANS, CHARLES A., SLAVIN, HOWARD B., and BERRY, GEORGE PACKER. Studies on herpetic infection in mice. IV. The effect of specific antibodies on the progression of the virus within the nervous system of young mice, 429

GEIGER, JAMES W. See DUBOS and GEIGER, 143

GEIMAN, QUENTIN M., ANFINSEN, CHRISTIAN B., MCKEE, RALPH W., ORMSBEE, RICHARD A., and BALL,

ERIC G. Studies on malarial parasites. VII. Methods and techniques for cultivation, 583
—. See ANFINSEN, GEIMAN, MCKEE, ORMSBEE, and BALL, 607
—. See MCKEE, ORMSBEE, ANFINSEN, GEIMAN, and BALL, 569
GOEBEL, WALTHER F. See PERLMAN and GOEBEL, 223, 235
GOTH, ANDRES. See SULKIN, ZARAFONETIS, and GOTH, 277

HARRIS, T. N., and EHRICH, W. E. The fate of injected particulate antigens in relation to the formation of antibodies, 157
HAVENS, W. PAUL, JR. Immunity in experimentally induced infectious hepatitis, 403
HEIDELBERGER, MICHAEL. See MAYER, OSLER, BIER, and HEIDELBERGER, 535
HENLE, GERTRUDE, and HENLE, WERNER. Studies on the toxicity of influenza viruses. I. The effect of intracerebral injection of influenza viruses, 623
—. See HENLE and HENLE, 639
HENLE, WERNER, and HENLE, GERTRUDE. Studies on the toxicity of influenza viruses. II. The effect of intraabdominal and intravenous injection of influenza viruses, 639
—. See HENLE and HENLE, 623
HEYS, FLORENCE M. See SMITH, BLATTNER, and HEYS, 1

IRONS, EDWIN N. See WOOD and IRONS, 365
—. See WOOD, MCLEOD, and IRONS, 377

KANE, LEWIS W. See ENDERS, KANE, MARIS, and STOKES, 341
—. See MARIS, ENDERS, STOKES, and KANE, 323
KANE, LEWIS W. See STOKES, ENDERS, MARIS, and KANE, 407
KOPROWSKI, HILARY, and LENNETTE, EDWIN H. Effect of *in vitro* cultivation on the pathogenicity of Venezuelan equine encephalomyelitis virus, 205
— and —. Effect of *in vitro* cultivation on the pathogenicity of West Nile virus, 181
KRIMSKY, I. See RACKER and KRIMSKY, 191

LANCEFIELD, REBECCA C., and DOLE, VINCENT P. The properties of T antigens extracted from group A hemolytic streptococci, 449
LANNI, FRANK. The specificity of serological precipitation, 167

—. See ENDERS, KANE, MARIS, and STOKES, 341

—. See MARIS, ENDERS, STOKES, and KANE, 323

SULKIN, S. EDWARD, ZARAFONETIS, CHRISTINE, and GOTH, ANDRES. Influence of anesthesia on experimental neurotropic virus infections. I. *In vivo* studies with the viruses of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies, 277

SWIFT, HOMER F. See WATSON, ROTHBARD, and SWIFT, 127

WACHSTEIN, M. Influence of experimental kidney damage on histochemically demonstrable lipase activity in the rat. Comparison with alkaline phosphatase activity, 25

WANG, S. C., PAINTER, E. E., and OVERMAN, R. R. Fluorescein circulation time as a prognostic sign in experimental traumatic shock, 549

WATSON, BARBARA. See WOOD, SMITH, and WATSON, 387

WATSON, ROBERT F., ROTHBARD, SIDNEY, and SWIFT, HOMER F. Type-specific protection and immunity following intranasal inoculation of monkeys with group A hemolytic streptococci, 127

WILSON, ARMINE T. Experimental vibrio infections of developing chick embryos, 293

WILSON, H. E. See SASLAW, WILSON, DOAN, WOOLPERT, and SCHWAB, 113, 263

WISE, HENRY. See ROBERTSON, PUCK, and WISE, 559

WOOD, W. BARRY, JR., and IRONS, EDWIN N. Studies on the mechanism of recovery in pneumococcal pneumonia. II. The effect of sulfonamide therapy upon the pulmonary lesion of experimental pneumonia, 365

—, MCLEOD, CHARLOTTE, and IRONS, EDWIN N. Studies on the mechanism of recovery in pneumococcal pneumonia. III. Factors influencing the phagocytosis of pneumococci in the lung during sulfonamide therapy, 377

—, SMITH, MARY RUTH, and WATSON, BARBARA. Studies on the mechanism of recovery in pneumococcal pneumonia. IV. The mechanism of phagocytosis in the absence of antibody, 387

WOOLPERT, O. C. See SASLAW, WILSON, DOAN, WOOLPERT, and SCHWAB, 113, 263

ZARAFONETIS, CHRISTINE. See SULKIN, ZARAFONETIS, and GOTH, 277

INDEX TO SUBJECTS

ACID, ribonucleic, basophile substance, mobilization in cytoplasm of liver cells with production of tumors by butter yellow, 91
—, ribonucleic, localization in cytoplasm of liver cells, 107
Adsorption, bacteriophage, effect on multiplication of host, *Escherichia coli* B, data on composition of bacteriophage, T2, 511
Air-borne infection, construction and operation of experimental rooms for study of, 559
Alkaline phosphatase activity, influence of kidney damage on histochemically demonstrable lipase activity, comparison with, 25
Anesthesia, influence on neurotropic virus infections, *in vivo* studies with viruses of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies, 277
Antibodies, fate of injected particulate antigens in relation to formation, 157
—, specific, effect on progression of herpes virus within nervous system of young mice, 429
Antibody, complement-fixing, presence, and resistance to mumps in human beings, correlation, 323
—, mechanism of phagocytosis in pneumococcal pneumonia in absence, 387
Antigens, T, extracted from group A hemolytic streptococci, properties, 449
—, injected particulate, fate in relation to formation of antibodies, 157
—, somatic, Flexner dysentery bacilli, serological and toxic properties, 223

BACILLI, dysentery, Flexner, quantitative study of serological cross-reactions, 235
—, dysentery, Flexner, serological and toxic properties of somatic antigens, 223
Bacteriophage adsorption, effect on multiplication of host, *Escherichia coli* B, data on composition of bacteriophage, T2, 511
Basophile substance, ribonucleic acid, mobilization in cytoplasm of liver cells with production of tumors by butter yellow, 91
Blood, monkey, normal and parasitized with *Plasmodium knowlesi*, chemistry and metabolism, 569
Brains, mouse, inhibition of phosphorylation of glucose by viruses and prevention by preparations of diphosphopyridine nucleotide in, 191
Butter yellow, mobilization of basophile substance, ribonucleic acid, in cytoplasm of liver cells with production of tumors by, 91

CANADIAN voles, rickettsial infection, 37
Cations and magnesium, activating effect on hemolytic function of complement, 535
Cells, liver, cytoplasm, localization of ribonucleic acid in, 107
—, liver, mobilization of basophile substance, ribonucleic acid, in cytoplasm with production of tumors by butter yellow, 91
—, mammalian liver, fractionation by differential centrifugation, problems, methods, and preparation of extract, 51
—, mammalian liver, fractionation by differential centrifugation, procedures and results, 61

Cellular and humoral immunity to influenza virus A infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 113
— and humoral immunity to *Streptococcus hemolyticus*, group C, infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 263
Centrifugation, differential, fractionation of mammalian liver cells by, problems, methods, and preparation of extract, 51
—, differential, fractionation of mammalian liver cells by, procedures and results, 61
Chemical studies on host-virus interactions, chemical simulation of interference phenomenon by 5-methyltryptophane, 525
— studies on host-virus interactions, effect of bacteriophage adsorption on multiplication of host, *Escherichia coli* B, data on composition of bacteriophage, T2, 511
Chemistry and metabolism of monkey blood, normal and parasitized with *Plasmodium knowlesi*, 569
Circulation time, fluorescein, as prognostic sign in traumatic shock, 549
Complement, hemolytic function, activating effect of magnesium and other cations, 535
Complement-fixing antibody, presence, and resistance to mumps in human beings, correlation, 323
Cultivation, *in vitro*, effect on pathogenicity of Venezuelan equine encephalomyelitis virus, 205
—, *in vitro*, effect on pathogenicity of West Nile virus, 181
— of malarial parasites, methods and techniques, 583
Cytoplasm of liver cells, localization of ribonucleic acid in, 107
— of liver cells, mobilization of basophile substance, ribonucleic acid, with production of tumors by butter yellow, 91

DERMANYSSUS *gallinae*, infection with St. Louis encephalitis by feeding on chickens with viremia, transovarian passage of virus into second generation, 1
Dietary effect in nutrition of host and natural resistance to infection as conditioned by heterogeneity of test pathogen population, 305
Diphosphopyridine nucleotide preparations, inhibition of phosphorylation of glucose in mouse brains by viruses and prevention by, 191
Dysentery bacilli, Flexner, quantitative study of serological cross-reactions, 235
— bacilli, Flexner, serological and toxic properties of somatic antigens, 223

EASTERN and Western equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277
Edematous and normal skin of animals and man, pressure and interstitial resistance prevailing in, 473
Embryos, chick, developing, vibrio infections of, 293
Encephalitis, St. Louis, infection of chicken mites by feeding on chickens with viremia, transovarian passage of virus into second generation, 1
—, St. Louis, Western and Eastern equine encephalomyelitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277
Encephalomyelitis, equine, Western and Eastern, St. Louis encephalitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277

Encephalomyelitis virus, equine, Venezuelan, pathogenicity, effect of *in vitro* cultivation, 205
Endemic pneumonia of albino rat, nature of causal agent in infected mice, 15
— pneumonia of albino rat, transmission of communicable disease to mice from naturally infected rats, 7
Escherichia coli B, host, multiplication, effect of bacteriophage adsorption, data on composition of bacteriophage, T2, 511
Extract of mammalian liver cells, fractionated by differential centrifugation, problems, methods, and preparation, 51
Extracts, tissue, effects on *Staphylococcus aureus*, 247

FLEXNER dysentery bacilli, quantitative study of serological cross-reactions, 235
— dysentery bacilli, serological and toxic properties of somatic antigens, 223
Fluorescein circulation time as prognostic sign in traumatic shock, 549

GLOMERULONEPHRITIS, chronic, production in rats by injection of rabbit anti-rat-placenta serum, 211
Glucose, phosphorylation in mouse brains, inhibition by viruses, and prevention by preparations of diphosphopyridine nucleotide, 191
Growth of *Plasmodium knowlesi in vitro*, factors affecting, 607

HEMOLYTIC function of complement, activating effect of magnesium and other cations, 535
— streptococci, group A, properties of T antigens extracted from, 449
Hemolytic streptococci, group A, type-specific protection and immunity following intranasal inoculation of monkeys with, 127
Hepatitis, infectious, induced, immunity in, 403
Herpetic infection, effect of specific antibodies on progression of virus within nervous system of young mice, 429
Histochemically demonstrable lipase activity, influence of kidney damage, comparison with alkaline phosphatase activity, 25
Horse encephalomyelitis virus, Venezuelan, pathogenicity, effect of *in vitro* cultivation, 205
— encephalomyelitis, Western and Eastern, St. Louis encephalitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277
Humoral and cellular immunity to influenza virus A infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 113
— and cellular immunity to *Streptococcus hemolyticus*, group C, infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 263
Hypersensitivity, dermal, presence, and resistance to mumps, correlation, 341

IMMUNITY, humoral and cellular, to influenza virus A infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 113
—, humoral and cellular, to *Streptococcus hemolyticus*, group C, infection in monkeys, relative rôles under conditions of optimal or deficient nutrition, 263
— in induced infectious hepatitis, 403

Immunity, mumps, correlation of presence of complement-fixing antibody and resistance to mumps in human beings, 323
—, mumps, correlation of presence of dermal hypersensitivity and resistance to mumps, 341
—, mumps, vaccination of human beings with formolized mumps virus, 407
— and protection, type-specific, following intranasal inoculation of monkeys with group A hemolytic streptococci, 127
Infection, air-borne, construction and operation of experimental rooms for study of, 559
Influenza virus A infection, reactions of monkeys to, relative rôles of humoral and cellular immunity under conditions of optimal or deficient nutrition, 113
— viruses, toxicity, effect of intraabdominal and intravenous injection, 639
— viruses, toxicity, effect of intracerebral injection, 623
Inhibition of phosphorylation of glucose in mouse brains by viruses and prevention by preparations of diphosphopyridine nucleotide, 191
Injection, intraabdominal and intravenous, effect on toxicity of influenza viruses, 639
—, intracerebral, effect on toxicity of influenza viruses, 623
— of rabbit anti-rat-placenta serum, production of chronic glomerulonephritis in rats by, 211
Inoculation, intranasal, of monkeys, with group A hemolytic streptococci, type-specific protection and immunity following, 127
Interstitial pressure in animal and human skin, effects of venous obstruction, 495
— resistance and pressure prevailing in normal and edematous skin of animals and man, 473

KIDNEY damage, influence on histochemically demonstrable lipase activity, comparison with alkaline phosphatase activity, 25

LESION, pulmonary, of pneumonia, effect of sulfonamide therapy, 365
Lipase activity, histochemically demonstrable, influence of kidney damage, comparison with alkaline phosphatase activity, 25
Liver cells, cytoplasm, localization of ribonucleic acid in, 107
— cells, mammalian, fractionation by differential centrifugation, problems, methods, and preparation of extract, 51
— cells, mammalian, fractionation by differential centrifugation, procedures and results, 61
— cells, mobilization of basophile substance, ribonucleic acid, in cytoplasm with production of tumors by butter yellow, 91
Lung, factors influencing phagocytosis of pneumococci in, during sulfonamide therapy, 377
— lesion of pneumonia, effect of sulfonamide therapy, 365

MAGNESIUM and other cations, activating effect on hemolytic function of complement, 535
Malarial parasites, chemistry and metabolism of monkey blood, normal and parasitized with *Plasmodium knowlesi*, 569
—parasites, factors affecting growth of *Plasmodium knowlesi in vitro*, 607
— parasites, methods and techniques for cultivation, 583
Mammalian liver cells, fractionation by differential centrifugation, problems, methods, and preparation of extract, 51
— liver cells, fractionation by differential centrifugation, procedures and results, 61

Man and animal skin, interstitial pressure in, effects of venous obstruction, 495
— and animals, normal and edematous skin, pressure and interstitial resistance prevailing in, 473
—, correlation of presence of complement-fixing antibody and resistance to mumps in, 323
—, vaccination with formolized mumps virus, 407
Metabolism and chemistry of monkey blood, normal and parasitized with *Plasmodium knowlesi*, 569
5-Methyltryptophane, chemical simulation of interference phenomenon by, 525
Mites, chicken, infection with St. Louis encephalitis by feeding on chickens with viremia, transovarian passage of virus into second generation, 1
Mumps, immunity, correlation of presence of complement-fixing antibody and resistance to mumps in human beings, 323
—, immunity, correlation of presence of dermal hypersensitivity and resistance to mumps, 341
—, immunity, vaccination of human beings with formolized mumps virus, 407

NEPHRITIS, glomerulo-, chronic, production in rats by injection of rabbit anti-rat-placenta serum, 211
Nervous system of young mice, effect of specific antibodies on progression of herpes virus within, 429
Neurotropic virus infections, influence of anesthesia, *in vivo* studies with viruses of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies, 277
Nose, type-specific protection and immunity following inoculation of monkeys with group A hemolytic streptococci, 127
Nucleotide preparations, diphosphopyridine, inhibition of phosphorylation of glucose in mouse brains by viruses and prevention by, 191
Nutrition, host, and natural resistance to infection, dietary effect as conditioned by heterogeneity of test pathogen population, 305
—, optimal or deficient conditions, relative rôles of humoral and cellular immunity to influenza virus A infection in monkeys under, 113
—, optimal or deficient conditions, relative rôles of humoral and cellular immunity to *Streptococcus hemolyticus*, group C, infection in monkeys under, 263

PARASITES, malarial, chemistry and metabolism of monkey blood, normal and parasitized with *Plasmodium knowlesi*, 569
—, malarial, factors affecting growth of *Plasmodium knowlesi in vitro*, 607
—, malarial, methods and techniques for cultivation, 583
Pathogenicity of Venezuelan equine encephalomyelitis virus, effect of *in vitro* cultivation, 205
— of West Nile virus, effect of *in vitro* cultivation, 181
Phagocytosis in pneumococcal pneumonia, mechanism in absence of antibody, 387
— of pneumococci in lung during sulfonamide therapy, factors influencing, 377
Phosphatase activity, alkaline, influence of kidney damage on histochemically demonstrable lipase activity, comparison with, 25
Phosphorylation of glucose in mouse brains, inhibition by viruses and prevention by preparations of diphosphopyridine nucleotide, 191
Placenta, rat, rabbit antiserum, chronic glomerulonephritis produced by injection of, 211

Plasmodium knowlesi, chemistry and metabolism of monkey blood, normal and parasitized with, 569
— *knowlesi*, *in vitro* growth, factors affecting, 607
Pneumococcal pneumonia, mechanism of recovery, effect of sulfonamide therapy upon pulmonary lesion of pneumonia, 365
— pneumonia, mechanism of recovery, factors influencing phagocytosis of pneumococci in lung during sulfonamide therapy, 377
— pneumonia, mechanism of recovery, phagocytosis in absence of antibody, 387
Pneumococci, phagocytosis in lung during sulfonamide therapy, factors influencing, 377
Pneumonia, endemic, of albino rat, nature of causal agent in infected mice, 15
—, endemic, of albino rat, transmission of communicable disease to mice from naturally infected rats, 7
—, pneumococcal, mechanism of recovery, effect of sulfonamide therapy upon pulmonary lesion of pneumonia, 365
—, pneumococcal, mechanism of recovery, factors influencing phagocytosis of pneumococci in lung during sulfonamide therapy, 377
—, pneumococcal, mechanism of recovery, phagocytosis in absence of antibody, 387
Poliomyelitis (Lansing), Western and Eastern equine encephalomyelitis, St. Louis encephalitis, and rabies viruses, *in vivo* studies on influence of anesthesia, 277
Population, test pathogen, dietary effect in nutrition of host and natural resistance to infection as conditioned by heterogeneity of, 305
Precipitation, serological, specificity, 167
Pressure, interstitial, in animal and human skin, effects of venous obstruction, 495
— and interstitial resistance prevailing in normal and edematous skin of animals and man, 473

RABIES, Western and Eastern equine encephalomyelitis, St. Louis encephalitis, and poliomyelitis (Lansing) viruses, *in vivo* studies on influence of anesthesia, 277
Resistance, interstitial, and pressure, prevailing in normal and edematous skin of animals and man, 473
— to infection, natural, and host nutrition, dietary effect as conditioned by heterogeneity of test pathogen population, 305
— to mumps and presence of complement-fixing antibody in human beings, correlation, 323
— to mumps and presence of dermal hypersensitivity, correlation, 341
Ribonucleic acid, basophile substance, mobilization in cytoplasm of liver cells with production of tumors by butter yellow, 91
— acid, localization in cytoplasm of liver cells, 107
Rickettsial infection in Canadian voles, 37

ST. LOUIS encephalitis, infection of chicken mites by feeding on chickens with viremia, transovarian passage of virus into second generation, 1
— encephalitis, Western and Eastern equine encephalomyelitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277
Serological cross-reactions, Flexner dysentery bacilli, quantitative study, 235
— precipitation, specificity, 167

Serological and toxic properties of somatic antigens of Flexner dysentery bacilli, 223
Serum, rabbit anti-rat-placenta, production of chronic glomerulonephritis in rats by injection of, 211
Shiga toxin and toxoid, preparation and properties, 143
Shock, traumatic, fluorescein circulation time as prognostic sign, 549
Skin, animal and human, interstitial pressure in, effects of venous obstruction, 495
— hypersensitivity, presence, and resistance to mumps, correlation, 341
—, normal and edematous, of animals and man, pressure and interstitial resistance prevailing in, 473
Specific antibodies, effect on progression of herpes virus within nervous system of young mice, 429
Specificity of serological precipitation, 167
—, type-, protection and immunity following intranasal inoculation of monkeys with group A hemolytic streptococci, 127
Staphylococcus aureus, effects of tissue extracts, 247
Streptococci, hemolytic, group A, properties of T antigens extracted from, 449
—, hemolytic, group A, type-specific protection and immunity following intranasal inoculation of monkeys with, 127
Streptococcus hemolyticus, group C, infection, reactions of monkeys to, relative rôles of humoral and cellular immunity under conditions of optimal or deficient nutrition, 263
Sulfonamide therapy, effect upon pulmonary lesion of pneumonia, 365
— therapy, factors influencing phagocytosis of pneumococci in lung during, 377
THERAPY, sulfonamide, effect upon pulmonary lesion of pneumonia, 365
—, sulfonamide, factors influencing phagocytosis of pneumococci in lung during, 377
Tissue extracts, effects on *Staphylococcus aureus*, 247
Toxic and serological properties of somatic antigens of Flexner dysentery bacilli, 223
Toxicity of influenza viruses, effect of intraabdominal and intravenous injection, 639
— of influenza viruses, effect of intracerebral injection, 623
Toxin and toxoid, Shiga, preparation and properties, 143
Toxoid and toxin, Shiga, preparation and properties, 143
Transmission of endemic pneumonia of albino rat, communicable disease, to mice from naturally infected rats, 7
Transovarian passage of St. Louis encephalitis virus into second generation of chicken mites by infection by feeding on chickens with viremia, 1
Traumatic shock, fluorescein circulation time as prognostic sign, 549
Tumors, production by butter yellow, mobilization of basophile substance, ribonucleic acid, in cytoplasm of liver cells with, 91

VACCINATION of human beings with formolized mumps virus, 407
Venezuelan equine encephalomyelitis virus, pathogenicity, effect of *in vitro* cultivation, 205
Venous obstruction, effects upon interstitial pressure in animal and human skin, 495
Vibrio infections of developing chick embryos, 293
Virus, herpes, progression within nervous system of young mice, effect of specific antibodies, 429

Virus infections, neurotropic, influence of anesthesia, *in vivo* studies with viruses of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies, 277
—, influenza A, infection, reactions of monkeys to, relative rôles of humoral and cellular immunity under conditions of optimal or deficient nutrition, 113
—, mumps, formolized, vaccination of human beings with, 407
—, St. Louis encephalitis, transovarian passage into second generation of chicken mites by infection by feeding on chickens with viremia, 1
—, Venezuelan equine encephalomyelitis, pathogenicity, effect of *in vitro* cultivation, 205
—, West Nile, pathogenicity, effect of *in vitro* cultivation, 181
Virus-host interactions, chemical studies, chemical simulation of interference phenomenon by 5-methyltryptophane, 525
Virus-host interactions, chemical studies, effect of bacteriophage adsorption on multiplication of host, *Escherichia coli* B, data on composition of bacteriophage, T2, 511
Viruses, influenza, toxicity, effect of intraabdominal and intravenous injection, 639
—, influenza, toxicity, effect of intracerebral injection, 623
—, inhibition of phosphorylation of glucose in mouse brains by, and prevention by preparations of diphosphopyridine nucleotide, 191
— of Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies, *in vivo* studies on influence of anesthesia, 277

WEST Nile virus, pathogenicity, effect of *in vitro* cultivation, 181
Western and Eastern equine encephalomyelitis, St. Louis encephalitis, poliomyelitis (Lansing), and rabies viruses, *in vivo* studies on influence of anesthesia, 277
